Aim

To create innovative and useful applications while learning new technologies and project management methodologies.

Professional Experience

Programmer Analyst - Humana, Louisville, KY 10/2003 - Present

Develop and enhance the Personal Nurse Intranet application used by over 100 nurses to manage high risk members. Troubleshoot and resolve issues relating to the Personal Nurse application. Maintain the development and quality assurance servers used to develop and test the Personal Nurse application. Develop reports detailing the usage trends of the Personal Nurse application.

Key Accomplishments

- Sole developer on a project to import member information received from a third party health management company into the Personal Nurse application. This project seamlessly integrated member information received on a weekly basis into the Personal Nurse application. This project has served as a template for other projects requiring the import of third party data and was beneficial because it fulfilled the request of a customer who was already using the data provided by the health management company.
- Primary developer on the Eligibility Update project. This project updated the eligibility information of members stored in the Personal Nurse application. Previously member's eligibility information was only entered into Personal Nurse when the member was added to the system. This project created a process that updates member eligibility once a month by retrieving the current member eligibility information from the mainframe and importing it into Personal Nurse. Nurses have benefitted greatly by the project. Now that the eligibility information is current the nurses do not make calls to members who no longer have Humana insurance or are otherwise ineligible for Personal Nurse.

Programmer Analyst - Kindred Healthcare, Louisville, KY 6/2000 - 10/2003

Developed Internet/Intranet applications used by over 50,000 employees. Updated and maintained legacy Internet/Intranet applications. Troubleshoot and resolved issues relating to Internet/Intranet applications and servers. Maintained development Internet/Intranet servers.

Key Accomplishments

- Primary developer on the Human Resources (HR) web site, an electronic repository of HR documentation that had previously only been distributed in paper format. The web site reduced printing costs, provided a uniform place for all employees to receive HR related information and reduced calls to the HR hotline.
- Primary developer on a project to outsource the company's Compliance Hotline. This project not only increased the hotline's available hours from 9 to 24, but it also freed two employees in the Compliance department to do other compliance related tasks.

- Primary developer on the Credible Allegation Library (CAL) project. This project provided administrators at remote facilities with a library containing previously successful credible allegations of compliance (CAC) and requests for informal dispute resolutions (IDR). Field administrators use this library to create CACs and IDRs, reducing fees paid to outside legal council and decreasing the time necessary to address deficiencies.

Systems Software Analyst - Humana, Louisville, KY

10/1998 - 6/2000

Developed Internet/Intranet applications. Evaluated and developed implementation plans for third party Internet/Intranet based applications. Created installation, configuration, and disaster recovery documentation for third party applications and those developed in-house. Investigated and resolved issues relating to Internet/Intranet applications and servers. Maintained development Internet/Intranet servers.

Key Accomplishments

- Created web usage reports using Microsoft Site Server Usage Analyst and Webtrends Reporting software. These reports were used by management to study usage trends of Internet and Intranet sites to plan the strategic direction for these environments.
- Developer on the E-Humana initiative. This allowed Humana members to access their insurance coverage and claims information via the web reducing customer service hotline calls and administrative overhead.
- Implemented enterprise web reporting solutions from Actuate and Cognos.

Network Systems Analyst - Humana , Louisville, KY

10/1997 - 10/1998

Investigated and resolve problems related to enterprise servers. Configure and install Internet firewalls. Updated hardware, software, and firmware of servers, tape drives, and hard disk arrays. Performed Quality Assurance/Standards tests on new enterprise servers.

Key Accomplishments

- Member of the team that installed Raptor Eagle Internet firewalls at newly acquired facilities. This ensured these facilities' connections to the company network was secure and in compliance with corporate standards.
- Trained several new employees on corporate best practices and preferred hardware and software platforms.

Intern - Humana, Louisville, KY

1/1996 - 10/1997

Created installation, configuration, and disaster recovery documentation for new hardware and software. Evaluated new hardware and software products. Updated departmental web site. Maintained hardware, software, and network resources contained within the test lab to ensure a working test environment for all IS employees.

Key Accomplishments

- Inventoried hardware and software within the lab and developed a check-in/check-out system to track availability. This reduced lost equipment and helped mitigate problems caused by many employees all trying to test with limited resources.
- Redesigned team home page and maintained IS organizational chart on the web. This site was the predecessor to the company's Intranet home page.
- Installed network hubs and wiring to support the test lab's token ring and ethernet networks.

Technical Skills

Visual Basic, Active Server Pages, Vbscript, Javascript, COM, COM+, Visual SourceSafe, IIS, SQL Server 7.0, SQL Server 2000, XML, Crystal Reports, Oracle 9i
